

CAMILA YEREMIN

141 Red River Way, San Jose, CA 95136

☎ 408-832-9391 ✉ yereminsasha@gmail.com <https://www.linkedin.com/in/camila-yeremin-164512252/> <https://github.com/camilayeremin>

Education

California Polytechnic State University, San Luis Obispo

Sep. 2022 – June 2026

Bachelor of Science in Liberal Arts and Engineering, Computer Science and Digital Art

San Luis Obispo, California

Relevant Coursework

- Introduction to Computer Graphics
- Real Time 3D Graphics Software Systems
- Mixed Reality
- Game Design
- 3D Modeling and Animation
- Linear Algebra and Differential Equations
- Concept Art and Storyboarding

Project

Path of Anu VR Spell Casting Experience | *Unity, Houdini, Maya, C#, Meta Dev Tools* **January 2026 - June 2026**

- Built environment in VR while maintaining optimization through creating Houdini digital assets, tracking asset poly count, and ensuring reasonable performance of VFX and shaders.
- Wrote subscripts branching from central spell manager system to drive individual spell-asset interactions with the player. Utilized an object-oriented system that was driven through extensive Unity layer and tag management to profile different spell types and interactable assets.
- Integrated Unity project with Meta development pipeline by installing necessary packages, changing target builds, and changing render pipelines when shaders/VFX wouldn't execute on the headset through URP.

CMYKindom, OpenGL Custom Game Engine | *OpenGL, C++, Linear Algebra*

April 2026- June 2026

- Implemented skeletal animation with 3rd-person camera-hooked protagonist using assimp to simplify 3d file formats and present skeletal, animation, and mesh data into one data structure. Making it easier to collect data for timed keyframes, individual bone transformations, and calculating bone matrices to pass down to vertex shader for the final animated skinned mesh.
- Sound integration to the engine for ambient music and SFX.
- Water shader that utilized lerping between shallow and deep values obtained by the world's terrain, as well as a vertex shader to simulate waves.

SL0me, NPC-player Interaction System | *Unity, C#*

June 2025 - September 2025

- Used object oriented structure to organize emotional system for NPCs by classifying personality types, love languages, and updating data structures that hold NPC's current emotional state.
- Used Unity's graphs and scriptable objects to store personal data about NPCs.
- Worked on building the 3D environment of the NPC testing ground which included shaders and a mix between custom and publicly available assets.

Experience

Expressive Technologies Studio

September 2025 – June 2026

Lab Manager

San Luis Obispo, CA

- Was in charge of rental system where I oversaw, assembled, and prepped equipment like Meta Quests, camera, and lighting equipment .
- Prepared dynamic lighting work for artists and guest speakers performing in the studio, set rooms up for play-testing sessions with students, and maintained that the technology and software in the space was always updated.
- Utilized Google Apps Script editor to maintain a regularly updating spreadsheet of all the assets in the studio including their availability, storage unit location, accessories, etc.
- Regularly used the Adobe suite (Illustrator and Photoshop) to make posters and large-scale banners banners for events taking place in the studio.

Guzik Technical Enterprises

June 2023 – August 2023

Back End Developer

Mountain View, CA

- Optimized flow of data by improving caching of data sent to the browser so employees can see real-time data outputted from high speed digitizers.
- Assisted front end development to make information on the main page more readable and to fix data not being properly displayed on graphs.

Technical Skills

Languages: C, C++, C#, HTML/CSS, Python, JavaScript

Softwares/Frameworks: Unity, Houdini, Maya, Adobe Suite, OpenGL, Github

Leadership / Extracurricular

Hack4Impact

Spring 2020 – Present

Developer

California Polytechnic State University, San Luis Obispo

- Developed a rewards program alongside 5 developers and 3 designers for Palo Alto Food Co-op to drive more community membership and open a new store location.
- Worked alongside designers to bring develop the front end functionality and look of the portal and website.
- Assisted in the backend development regarding full-stack optimization, PDF exporting functionality, checksum for data security, and implementing referral logic.
