Education

California Polytechnic State University, San Luis Obispo

B.S. Liberal Arts and Engineering — Computer Science and Digital Art, GPA:3.6

Sep. 2022 – June 2026

San Luis Obispo, CA

Ohlone College

A.A. in Virtual Production, GPA:4.0

Sep. 2026 – June 2028

Fremont, CA

Relevant Coursework: Real-Time 3D Graphics Software, Mixed Reality, Game Design, 3D Modeling & Animation, Linear Algebra, Concept Art & Storyboarding

Projects

Path of Anu, VR Spell Casting Experience | *Unity, Houdini, Maya, C#, Meta Dev Tools*

Jan. 2026 – June 2026

- Built and optimized a VR environment using Houdini digital assets, controlled polygon counts, and performance-conscious VFX and shaders.
- Worked with an object-oriented spell system in C# using a central spell manager, Unity layers, and tags to coordinate player and asset interactions.
- Integrated Meta's development pipeline and migrated rendering to URP to ensure shaders and VFX executed correctly on headset hardware.

CMYKindom, OpenGL Custom Game Engine | *OpenGL, C++, Linear Algebra*

Apr. 2026 – June 2026

- Implemented skeletal animation and a third-person camera using Assimp, keyframe interpolation, bone transformations, and vertex skinning.
- Integrated ambient music and sound effects into the custom game engine.
- Created a water shader using depth-based color interpolation and vertex displacement to simulate waves.

SLOme, NPC-Player Interaction System | *Unity, C#*

June 2025 – Sep. 2025

- Designed an object-oriented NPC emotional system based on personality types, love languages, and dynamically updated emotional states.
- Used Unity graphs and ScriptableObjects to organize and store persistent NPC data.
- Built a 3D NPC testing environment using custom shaders and a combination of original and publicly available assets.

Experience

Expressive Technologies Studio

Sep. 2025 – June 2026

Lab Manager

San Luis Obispo, CA

- Managed equipment rentals and prepared Meta Quest headsets, cameras, lighting equipment, and other studio technology for students and events.
- Set up dynamic lighting, play-testing rooms, and technical environments for artists, students, and guest speakers.
- Maintained an asset-tracking system using Google Apps Script to monitor equipment availability, storage locations, and accessories.
- Created event posters and large-format banners using Adobe Illustrator and Photoshop.

Guzik Technical Enterprises

June 2023 – Aug. 2023

Back-End Developer

Mountain View, CA

- Improved browser-side caching to optimize real-time data visualization from high-speed digitizers.
- Assisted front-end development by improving page readability and resolving graph display issues.

Technical Skills

Languages: C, C++, C#, Python, JavaScript, HTML/CSS

Software / Frameworks: Unity, Houdini, Maya, Substance 3D, Photoshop, OpenGL, GitHub

Leadership / Extracurricular

Hack4Impact

Fall 2024 – Winter 2025

Developer

California Polytechnic State University

- Developed a rewards platform with 5 developers and 3 designers for Palo Alto Food Co-op to support membership growth and a new store launch.
- Collaborated with designers to implement front-end functionality and visual design for the portal and website.
- Contributed to back-end optimization, PDF exporting, data checksums, and referral logic.
